

MUD 364 TRAILS CONSTRUCTION

Harris County Municipal Utility District No. 364 has begun construction of the Trails that run along the drainage channels within Coles Crossing. Please be aware that there will be heavy equipment and obstructions to traffic that will impact Sampson Elementary and other areas during this project.

We are well aware of the recent increase in pedestrian and bicycle activity and want to increase safety awareness during this construction project. Please be patient, exercise caution and use best judgment when traveling around these areas. The construction firm is aware of traffic and safety concerns and working around school opening and closing times.

Once the project is complete there will be an excellent trail system that will connect with the existing trails to form a continuous loop and include access points at various street locations. This will also serve to provide a direct and safe route for many of the children and parents traveling to and from Sampson Elementary.

MUD 364 has been committed to the development and completion of the Trails within Coles Crossing, and we appreciate your understanding and patience during this project that will deliver positive long term value to the Coles Crossing community.
